

SOUTH AUSTRALIA.

AGRICULTURAL

AND

LIVE STOCK STATISTICS

FOR THE YEAR ENDING

MARCH 31ST, 1876;

WITH

PREFATORY REPORT.

PRESENTED TO BOTH HOUSES OF PARLIAMENT BY HIS EXCELLENCY'S COMMAND

ADELAIDE :

BY AUTHORITY: W. C. COX, GOVERNMENT PRINTER, NORTH-TERRACE.

1876.

REPORT

TO THE

HONORABLE SIR HENRY AYERS, K.C.M.G., M.L.C.,
CHIEF SECRETARY,

&c., &c., &c.

Chief Secretary's Office, Adelaide, 25th July, 1876.

Sir—

I have the honor to submit to you, for the information of His Excellency the Governor, my Seventeenth Annual Report on the Agricultural and Live Stock Statistics of South Australia, being for the Season 1875-6, terminating 31st March last, briefly epitomising the several particulars inquired into relating to agricultural pursuits.

A Census having been appointed to be taken on the 27th March, it was decided to defer the collection of the usual Agricultural Statistics some weeks, in order that the same organization might avail for both objects; and it was not until the close of that month that the collectors commenced their duties. Immediately on receipt of the last return, on the 9th May, I was enabled to publish the usual statement showing the area of land under cultivation of wheat, the total produce, and average yield of each district. Prompt publication of the most important part of the Statistics materially enhances the value of the information supplied, but this can only be accomplished by the employment of a more numerous staff of collectors, as agricultural settlement continues to advance towards the remoter portions of the Province.

Excluding that portion of the Province known as the Northern Territory, the total area of South Australia is about 383,328 square miles, or 245,329,920 acres. It may be roughly estimated that not more than 250,000 square miles are at present put to profitable use. Agricultural settlement has not extended 150 miles from the coast, and pastoral occupation may be said to have reached no further than 500 miles, although squatters have lately taken up large areas of land discovered by recent explorations, (lying chiefly on the route of the overland telegraph) and which are considered capable of carrying stock. Twenty-six Counties have been proclaimed up to date, embracing 40,967 square miles, or 26,218,880 acres. Of this large area only 6,285,652 acres have been alienated from the Crown, amounting, nevertheless, to thirty acres for every man, woman, and child in the Colony, or one hundred and twenty acres for each male adult. About one in every five acres of the alienated land is under tillage; the remainder is used for pastoral purposes only. All land is surveyed by the Government prior to sale, and is divided into farms of extent varying from eighty to six hundred and forty acres, the necessary reserves being made for railways, public highways, watering of stock, &c. This land is thrown open for selection in large quantities—from 50,000 to 100,000 acres being put up at one time. There is usually as much as half a million of acres of land surveyed and open for immediate selection. The total area of land held for pastoral purposes beyond the boundaries of the counties mentioned is estimated to be 188,000 square miles.

A much larger area was taken up during the twelve months ending 31st December, 1875, than in any previous year. The quantity alienated from the Crown was 686,050 acres, of which 555,971 were selected under the system of deferred payments, and 130,079 acres purchased for cash. In the year 1874 the area alienated was 407,385 acres, of which 352,166 were selected upon deferred payment, and 55,219 acres sold for cash.

The following table shows the number of acres sold on credit since the introduction of

of the existing land system, and the aggregate amount to be paid on the termination of the agreements :—

	Area in Acres.	Amount.
1871.....	289,892	£372,536
1872.....	299,957	397,284
1873.....	279,512	435,485
1874.....	352,166	596,096
1875.....	555,971	764,140
Total	1,777,498	£2,565,544

The total quantity of land taken up during the five years since the Act has been in operation is 1,777,498 acres, for which £2,565,544 was agreed to be paid. Of this amount £2,406,251 still remains on credit, awaiting the termination of the agreements.

The fencing of runs and of newly-selected agricultural lands has again materially increased the area of enclosed land, which is now returned as 20,286,007 acres, as compared with 17,728,711 acres last year, or an addition of 2,557,296 acres. Deducting the acreage under cultivation, there remains 18,841,421 acres of fenced depasturage, which includes large tracts of waste lands held under lease from the Crown for pastoral purposes, and enclosed with more or less substantial sheep-proof fences. During the past ten years the enclosure of land has increased fourfold.

Returns from the northern counties and other newly-opened agricultural districts show satisfactory progress; very large areas of recently-selected land having been brought under the plough. The total increase of land under cultivation amounted to 114,102 acres, as compared with 105,411 acres in the preceding season. The aggregate area under tillage is 1,444,586 acres, as against 1,330,484 acres last year. One in every 4·4 acres of purchased land is under tillage. There are 6·8 acres of cultivated land for each individual of the population—equal to twenty-eight acres for each adult male, or sixty acres for each person returned at the last census as engaged on farms.

The following table exhibits the operation of the new land system, as affecting the settlement of farmers throughout the country since its inauguration in 1871 :—

Counties.	Acres under Cultivation.				
	1871-2.	1872-3.	1873-4	1874-5.	1875-6.

Total	1,044,656	1,164,846	1,225,073	1,330,484	1,444,586

It must be borne in mind that, although during the past five years (1870-5) the area of land alienated from the Crown, and the area of land brought under cultivation, have both increased fifty per cent., the addition to the population has only been fifteen per cent.—plainly indicating the necessity for an augmentation of the man-power requisite for the proper conduct of farming operations.

Nearly two-thirds of the total area cultivated is cropped with wheat, of which cereal 898,820 acres were reaped, as compared with 839,638 acres last year; or an increase of 59,182 acres, or seven per cent., being the same rate of increase as in the previous season.

The total quantity of wheat garnered was 10,739,834 bushels, the largest yield yet produced in the Colony, showing an increase of 877,141 bushels over the previous year, when 9,862,693 bushels were produced. The average yield per acre was 11 bushels 57lbs., or only 3lbs. short of 12 bushels. The preceding crop yielded eleven and three-quarters bushels.

The

The anticipations formed early in the year of an exceptionally good harvest, owing to the large rainfall throughout the season, were not realized, severe storms and heavy rain at harvest time having swept over some districts so severely as to lay the crops and prevent reaping ; whilst, in other localities, as much as two or three bushels to the acre were lost by the grain shaking out before the weather became sufficiently settled to enable the reaping-machine to work. Notwithstanding these drawbacks and the dearth of skilled farm labor, a satisfactory result was obtained, as shown in the fair average crop recorded.

In judging of the relative productiveness of the soil of South Australia as compared with that of other countries, it must be recollected that a great portion of the land has been sown with wheat continuously for many successive years without manure or rest, and, being in the hands of small proprietors, has received only the minimum of cultivation. This, of course, tends to reduce the general average ; but there are many districts where farming is carried on on a large scale, and with proper appliances, where the yield of this cereal is from ten to fifteen bushels per acre beyond the average shown above.

As evidence of the high quality of South Australian grain, it may be mentioned that the prize wheat exhibited at the Agricultural Shows during the past ten years has averaged 68lbs. weight to the Imperial bushel.

Calculating forty bushels to the ton, the gross produce amounted to 268,495 tons, which, at an average price of ten pounds per ton for wheat and flour, would yield £2,684,950, or an increase of £465,847 on the value of the preceding harvest.

After making the usual deductions for home requirements for food and seed, I estimated the quantity of last year's harvest available for export at 180,000 tons, of which 163,000 tons had been shipped up to the commencement of the new season. An estimate for the present season shows 213,000 tons of breadstuffs for export, of which 145,000 tons have already been sent forward.

The following statement shows the total area of land under cultivation, the acreage under wheat, the gross produce of the harvest, and the average yield per acre since 1858-9 :—

Season.	Acres Cultivated.	Acres under Wheat.	Produce, Wheat.	Average per Acre
			Bushels.	Bush. lbs.
1858-9	264,462	188,703	2,109,544	11 11
1859-60	361,884	218,216	2,103,411	9 38
1860-1	428,816	273,672	3,576,593	13 4
1861-2	486,667	310,636	3,410,756	10 59
1862-3	494,511	320,160	3,841,824	12 0
1863-4	555,968	335,758	4,691,919	14 0
1864-5	587,775	390,836	4,252,949	11 0
1865-6	660,569	410,608	3,587,800	8 44
1866-7	739,714	457,628	6,561,451	14 20
1867-8	810,734	550,456	2,579,894	4 40
1868-9	808,234	533,035	5,173,970	9 42
1869-70	850,576	532,135	3,052,320	5 45
1870-1	959,006	604,761	6,961,164	11 30
1871-2	1,044,656	692,508	3,967,069	5 44
1872-3	1,164,846	759,811	8,735,912	11 30
1873-4	1,225,073	784,784	6,178,816	7 52
1874-5	1,330,484	839,638	9,862,693	11 45
1875-6	1,444,586	898,820	10,739,834	11 57

There is again a noticeable increase in the quantity of land returned as in fallow (which includes freshly-broken ground), the total area being 303,700 acres, as against 264,327 acres, or an increase of 39,373 acres over that of last year. Nearly one-half the whole quantity given in the returns is from the newly-opened agricultural districts.

There was a slight increase in the extent of the hay crops, but a small decrease in the yield, the total acreage mown being 161,429 acres, or 498 acres more than last year ; and the total produce, 194,794 tons, or 8,140 tons less than last season, when the average yield per acre was twenty-five cwt. as compared with twenty-four cwt. this year.

About the same quantity of barley was sown, but the yield was not so large this year as in the previous season by 11,058 bushels. Of oats there were 3,640 acres sown, showing a product of 60,749 bushels, as against 2,785 acres in 1874-5, producing 40,701 bushels. The increase on this item was, therefore, 20,048 bushels.

Field peas show a continuing increase in the quantity gathered, as well as in the acreage under cultivation. Whilst in the previous season there were 4,328 acres thus occupied yielding 61,733 bushels, the return for the season under review shows 4,854 acres producing 78,050 bushels, or an average yield of sixteen and a-half bushels to the acre.

The

The total acreage under cultivation in potatoes was 5,941, or an increase over that of the previous year of 1,359 acres; whilst the yield increased from 17,046 tons to 26,833 tons. The average yield of the potato crop, for the whole Colony, was ninety cwt. as against seventy-four cwt. in the previous year—or sixteen cwt. more per acre. The Mount Gambier crop averaged nearly five tons to the acre.

There is a diminution to be noted in the acreage under flax, only 209 acres being grown, as compared with 274 acres in the previous season.

Of lucerne and sown grasses, grown for green forage, the returns show an increase upon last season, of 10,185 acres; the number of acres so occupied being 37,261, as compared with 27,076 last year.

Gardens and orchards cover 412 acres of land more than at the date of my last report, but the acreage under vines has decreased; only 4,972 acres being given as against 5,051 acres. The quantity of wine made is, however, returned at 727,979 gallons in season 1874-5, as compared with 648,186 gallons in season 1873-4; or 79,793 gallons in excess of the previous vintage. The average yield of wine was one hundred and fifty gallons to the acre.

LIVE STOCK.

The returns under this head show increases in all descriptions of stock. The number of horses (inclusive of those in towns and villages) has advanced from 93,122 to 107,164, being an increase on the previous year of 14,042. Horned cattle are returned at 219,240, an increase of 33,838 head. The number of fat cattle imported from Queensland during the twelve months was 11,007, or 1,556 more than in the previous year.

Sheep, including lambs, are stated to number 6,179,395, as against 6,120,211, or an increase of 59,184 only.

The quantity of wool, the produce of the Colony, shipped during the season ended 31st March, 1876, was 112,758 bales, containing 39,919,957lbs., of a declared value of £1,842,247 sterling.

I have the honor to be,

Sir,

Your obedient Servant,

J. BOOTHBY, Government Statist.

TABLE I.—ABSTRACT showing the AREA of each COUNTY and PASTORAL DISTRICT, the total COUNTRY and SUBURBAN LAND SOLD, the extent of LAND ENCLOSED, CULTIVATED, and ENCLOSED but not CULTIVATED, and the NUMBER and DESCRIPTION of LIVE STOCK in SOUTH AUSTRALIA, for the Year ended 31st March, 1876.

Counties and Districts.	Area in Square Miles.	Area in Acres.	Purchased Land to 31st December, 1875.	Extent of Land held by Freeholders.	Land Enclosed.	Land under Cultivation.	Land Enclosed but not Cultivated.	Live Stock.					
								Horses.	Horned Cattle.	Sheep (including Lambs.)	Goats.	Pigs.	Poultry of all kinds.
